

Postdoctoral Fellowships
Intramural Research Program
National Institute of Mental Health
Bethesda, Maryland, USA

The National Institute of Mental Health (NIMH), Laboratory of Brain and Cognition, Unit on Learning and Plasticity is seeking two postdoctoral fellows. Research in the lab focuses on studying learning, plasticity and visual cognition primarily with fMRI. Current interests include investigating how the visual representation of objects changes with experience and how cortical visual processing is affected by loss of peripheral input (e.g. in individuals with macular degeneration). The position is available October 2006.

Applicants should have a Ph.D. degree and a maximum of five years of experience. A strong background in neuroscience, psychology, cognitive science or related disciplines is required. Previous experience with fMRI, statistical methods and/or programming is helpful, but not essential.

NIMH is a major research component of the National Institutes of Health and the Department of Health and Human Services, which have nationwide responsibility for improving the health and well being of all Americans. Interested applicants should send curriculum vitae, bibliography, together with three letters of reference to: Ms. Laura Ortiz, National Institute of Mental Health, attn: LBC-ULP opening, 10 Center Drive, Building 10, Room 4C104, Bethesda, MD 20892, USA.

NIH and DHHS are Equal Opportunity Employers.
